PROFESSIONAL SUMMARY

Software Engineering diploma graduate with strong adaptability and a quick-learning approach. Continuously develops skills, readily understands new responsibilities, and works effectively across different environments, including technical, administrative, and supply chain functions.

TECHNICAL SKILLS

IT Support: Technical support, technical issue resolution, PC hardware and software, Windows, Linux
Programming and Web Development: Python, PHP, JavaScript, HTML, CSS
Data and Tools: SQL, Excel, Git, GitHub
Networking and Security: Networking basics, cybersecurity fundamentals

IT PROJECTS

Numberbook
- Developed a search tool to identify names registered to Saudi phone numbers.

FiveM Online
- Invented and developed a method to retrieve FiveM player information.

Dashboard MTA:SA
- Developed an original in-game user interface with expanded player-facing features.

Freeroam MTA:SA
- Created a customizable freeroam using an exclusive, smooth in-game library.

WORK EXPERIENCE

Independent Software Developer | Personal Projects | 2018–Present (intermittent)
- Managed ongoing personal project development through research into emerging technologies and technical approaches.
- Led and developed an original FiveM Online player-search website using PHP and CSS.
- Increased mobile access to player searches.
- Reduced player lookup time by more than 60% compared with the conventional method.

Call Center Agent | Extensya | Feb 2022–Mar 2022
- Managed customer calls and daily call operations while delivering professional customer service.

Cooperative Trainee, IT Support | Technical and Vocational Training Corporation (TVTC) | Feb 2022–Jul 2022
- Reduced technical issues during cooperative IT training by assisting with troubleshooting, resolving reported problems, and responding to student inquiries.

EDUCATION

Diploma in Software Engineering | Hail Technical College | 2019–2022
GPA: 4.47 / 5.00
